

- Ex approval II 2 G Ex ib IIB T4 (optional)
- Wear-free
- Corrosion-proof
- No moving parts
- Robust design
- High accuracy
- Maintenance-free
- Reliable
- High operational safety
- Fully immersible (IP68)
- Mercury-free

NDW 2

The new electronic NDW 2 inclinometer utilises a modern measurement method based on MEMS technology for gravitational inclination measurement (rotational angle measurement).

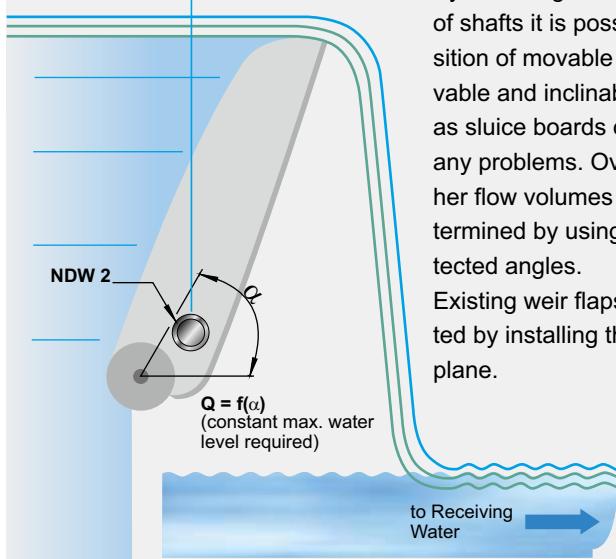

By detecting inclination without the use of shafts it is possible to capture the position of movable weir flaps or other movable and inclinable components such as sluice boards or slide valves without any problems. Overflow volumes or other flow volumes thus can be easily determined by using a Q/h relation or detected angles.

Existing weir flaps can be easily retrofitted by installing the unit on the inclined plane.

NDW 2 combines high accuracy and operational safety with robust design.

The compact unit is free of wear since the measurement principle does not use any movable parts and hence provides reliable measurement results even under flood conditions (IP68).

NDW 2 provides a 4 - 20 mA signal proportional to the angle of inclination (0 - 90° or 0 - 60°) to obtain overflow data. Following devices such as HydraulicCalculator Plus, NivuCont Plus, NivuFlow, NivuLog or PCS/SCADA systems use flap-specific data to compute accurate overflow volumes.

Power supply	18 to 28 V DC																																																				
Power consumption	60 mA at 24 V DC, max. 80 mA																																																				
Output	• 4 - 20 mA, galvanically isolated • load: max. 500 Ohm																																																				
Measurement range	• 0 ... 60° • 0 ... 90°																																																				
Resolution	0.1°																																																				
Measurement uncertainty	± 0,5°																																																				
Temperature influence	<± 0.5° [0-60 °C]																																																				
Settling time	1s / 90%																																																				
Enclosure	• protection IP68 • material: stainless steel 1.4571, Polyurethane																																																				
Cable	6-wire shielded cable, fixed																																																				
Cable length	10 / 20 / 30 / 50 / 100 m																																																				
Ex approval	no																																																				
Operating temperature	-20 °C to +60 °C																																																				
Storage temperature	-30 °C to +70 °C																																																				
Power supply	• 18 to 28 V DC, intrinsically safe circuit • max. 28 V / 110 mA																																																				
Power consumption	+4 ...+12 ...+20 mA (2-wire system)																																																				
Output	2-wire, load: max. 500 Ohm																																																				
Measurement range	• 0 ... 90°																																																				
Enclosure	• protection IP68 • material: die-cast aluminium																																																				
Cable	2-wire cable, fixed																																																				
Cable length	10 / 20 / 30 / 50 m																																																				
Ex approval	II 2 G Ex ib IIB T4																																																				
Operating temperature	-25 °C to +60 °C																																																				
Storage temperature	-30 °C to +70 °C																																																				
Max. humidity	80 %, non-condensing																																																				
Accessories (optional)	stainless steel adapter plate (120 x 167 mm) for installation using available boreholes in NDW Ex mounting plate
